|  | 1  | WAYNE AMSBURY PRIMARY PATENT EXAMINER  |  |  |  |

U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03) Continuation of 5. does NOT place the application in condition for allowance because: Applicant argues that there is no need to input physical color readings into the claim method. The Examiner respectfully points out that the instance application just simplifies the Corrigan's invention. Any one with the skill in the art would recognize that without the physical color input, the Corrigan's reference still works properly. The color code can be obtained from the VIN (See fig. 1, element 10). By adding the physical color, Corrigan just want to increase the accuracy of the painting job (col. 5, lines 32 - 37), narrow down the matching colors (col. 9 lines 1 - 5), by comparing the input physical color with the finsihed color. Therefore, the instance application is not patentable over Corrigan's reference..
